

## SLIP RESISTANCE TESTING OF FLOOR AND PAVING SURFACES

Construction Testing Services Ltd is pleased to announce that it now offers a comprehensive slip resistance testing service throughout **Ireland**.

CTS have obtained full **UKAS** accreditation for the measurement of slip resistance of surfaces using the Pendulum Tester (HSE's preferred method of slipperiness assessment).

Slip resistance is measured in order to assess performance for the safety of pedestrians.

Pendulum testing is suitable for a wide range of surfaces including: Pavers, Precast Units, Glass, Natural Stone, Ceramics, Resin Finishes, Concrete and Screed.

Construction Testing Services Ltd also measure surface roughness using a micro-roughness meter.

### SLIP RESISTANCE TESTING SERVICES INCLUDE:

- The measurement of slip resistance both on site and in our laboratory
- The measurement of surface roughness
- Advice on the interpretation of results

### CONTACT CTS:

(From Ireland) 00353 28 94469191

(From the UK) 028 94 469191

CTS have full UKAS accreditation for site and laboratory measurement using the Pendulum Tester to BS 7976-2.
